Short Answer Type:

1. During cutting a garment why do we leave approx. one inch of our measurement?

Ans : One inch extra of the garment is the margin cut. This extra fabric will help during stitching a garment. The attachment of the cut of pieces of garment is jointly attached. This gives proper shape to the outfit and the person can wear the garment according to his shape and fittings.

2. Which machine will you use – old model machine (manual machine) or new model machine (electronic machine)?

Ans : The new model machine is more time saving, easy to use, easy to mend clothes, easy to handle, lots of stitches can be done. It is portable and light weighted. It also occupies less space.
